EXPERIS · PREPARED FOR FIGURE AI

# Scaling the human data behind humanoid robots

Figure AI is training humanoid robots on millions of hours of real-world data. Experis builds and runs the human engine behind it: top-of-funnel talent, a proven annotation practice, and embedded AI engineering.

WHAT WE HEARD

# The challenge, in full

Before we talk about how we help, here is the problem as you framed it. Training a humanoid robot on real-world data takes a whole stack of things going right. This is our accounting of what has to be true for Figure AI to succeed.

THE OVERARCHING NEED

**Egocentric data**

First-person data captured from wearable cameras and sensors. It is the fuel for human-activity recognition, robotics, and embodied AI, and sourcing it at scale is the whole game.

Scale

**Volume, sustained**

Millions of hours of real-world data, captured over a multi-year ramp that only grows.

Workforce

**People, at the ready**

A large, distributed workforce to source, onboard, and manage continuously.

Environment

**Out in the world**

Capture in everyday, uncontrolled settings across diverse people and places.

Quality

**Clean signal**

The gains now come from the quality of human-reviewed data. Consistency is the hard part.

Security

**Data as crown-jewel IP**

Training data that can't leak, and can't end up feeding a competitor's model.

Velocity

**Keeping pace**

A pipeline that moves at the speed of the model roadmap and its launch timelines.

A PHASED APPROACH

# A phased approach to premier partnership

Start simple, then grow. Each step connects to the next and opens more ways we can help Figure AI. The work branches out as the partnership deepens.

Each phase connects to the next and opens more ways to work together. The partnership grows as the work does.

PHASE 1 · NOW

# Top-of-funnel talent support

We deliver qualified people, ready for the work. Survey-fed candidate lists feed a continuous flow of vetted candidates, scaled to exactly the numbers Figure AI needs, when they’re needed.

2026 demand, scaling with Figure AI through 2029

Illustrative: modeled to grow year over year through 2029.

Qualified and ready

Survey-fed, pre-vetted lists of people matched to the task.

Continuous fill

A rolling pipeline that adds, swaps, and replaces to hold quality steady as needs change.

Domestic first, global reach

A global sourcing engine, US-first, extending worldwide as volume demands.

Scales to your number

Right-sized to Figure AI’s exact targets, up or down, and never a fixed block.

PHASE 2 · WHERE THE REAL VALUE IS

# The human intelligence layer behind AI

Annotation is our edge, at scale and at quality. People label, review, and quality-check your data so models train, test, and improve. Leading tech companies are cancelling offshore contracts to bring this work onshore with us, for the quality their models now demand.

 **Image**

Objects, actions, scenes, products, events.

 **Video**

Temporal actions, tracking, egocentric capture.

 **Audio**

Transcription, speakers, intent, emotion.

 **Text**

Claims, forms, tickets, product data.

 **Code**

Review, correctness, and quality signals.

 **Security & Legal**

Sensitive-content and compliance review.

**Industries served**

Robotics, Wearables, AR/VR, including egocentric, first-person data.

**Measured against predefined targets**

We operate to defined KPIs (throughput, accuracy, turnaround, consistency), agreed up front and reported against.

### PHASE 3 · COMPOUNDING

# Forward-deployed AI engineering, as a service

A small, lean, forward-deployed AI engineering team, embedded alongside Figure AI to accelerate outcomes without the overhead of scaling headcount.

- Lean, senior, forward-deployed engineers
- Built for what's next: agents, evaluation, multimodal & 3D, governance

#### Flexible commercial model

#### Consumption-based

Pay for the engineering capacity you use as work scales up or down.

#### Outcome-based

Priced to delivered results, tied to the capability shipped.

WHY MANPOWERGROUP

# Why ManpowerGroup

One workforce partner, a family of specialist brands, operating in 80+ countries and trusted by the world’s leading technology companies. Two brands do the heavy lifting for Figure AI.

## Experis

Tech talent and IT services, the delivery engine for annotation and AI.

- Data annotation & AI model training
- Data, analytics & AI engineering
- Software & technical services
- Digital experience & UX research

## Talent Solutions

Sourcing and workforce at scale, how we fill the funnel.

- Talent Acquisition as a Service
- Solving the “**Slop Problem**”: precision hiring of scarce, specialized engineers (Mechanical Design, Whole Body Control, Perception) at scale.
- Global workforce programs across 80+ countries
- Career & talent management

**\$18B**

annual revenue (2025)

**Fortune 500**

global company

**80+**

countries, ~2,200 offices

**Millions**

connected to work each year

HOW WE HOLD QUALITY: THE KPIS WE OPERATE TO

✓ **Accuracy**

Scored against a gold-data rubric.

⚡ **Throughput**

Volume delivered to plan.

🕒 **Turnaround**

Cycle time to agreed SLAs.

🔄 **Consistency**

Inter-rater agreement held steady.

## Proven and secure

1,000+ consultants across 100+ AI programs, run to targets agreed up front and inside secure, IP-controlled facilities.

OUR COMMITMENT TO FIGURE

Fund the funnel.  
Own the annotation.  
Grow the partnership.

“We can help with data collection today, but the durable value we bring is a vetted, independent annotation practice and embedded AI engineering. That’s the partnership we want to build with Figure AI.”

**Kye Mitchell** Global Leader, Experis
